The address of the Company's head office is 3028 Quadra Court, Coquitlam, BC V3B 5X6. CCW's principal business activities are the acquisition, evaluation, exploration and development of mineral properties. To date, the Company has not realized any revenues from its properties.

These condensed interim consolidated financial statements were approved by the Board of Directors on May 30, 2022.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and evaluation activities, and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, government licensing requirements or regulations, social licensing requirements, non-compliance with regulatory and environmental requirements and aboriginal land claims.

Going concern

As at March 31, 2022, the Company had not yet achieved profitable operations, had a working capital deficiency of \$221,799 (December 31, 2021: working capital of \$1,773,846). For the period ended March 31, 2022 the Company incurred a net loss of \$1,583,128 (three months ended March 31, 2021: \$3,757,659), had cash outflow from operations of \$3,381,225 (three months ended March 31, 2021: \$3,292,380), had accumulated losses of \$66,407,352 (three months ended March 31, 2021: \$52,168,569) and expects to incur future losses in the development of its business. These items represent material uncertainties which cast significant doubt about the ability of the Company to continue as a going concern. The Company is in the process of exploring its properties and has not yet determined whether these properties contain economically recoverable reserves. The continued operations of the Company are dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the financing to complete the necessary exploration and development of such property and upon attaining future profitable production or proceeds from disposition of the properties. Management is actively pursuing additional sources of financing, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. See note 12(i).

These condensed interim consolidated financial statements have been prepared on a going concern basis and do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations. Such adjustments could be material.

Since January 1, 2020, the outbreak of the novel coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company, or on its ability to raise capital to fund exploration and operations, in future periods. While the Company has not been significantly impacted by the COVID-19 outbreak, it is not possible to reliably estimate the ongoing effect on the Company.

10. FINANCIAL INSTRUMENTS AND RISK FACTORS

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company is exposed to credit risk on its cash and amounts receivable. The Company has deposited its cash with reputable financial institutions, from which management believes the risk of loss is minimized. As at March 31, 2022 and December 31, 2021 cash was held with major Canadian financial institutions. Management believes that the risk of loss from amounts receivable is low. The Company is also exposed to credit risk with risk with respect to the amount owing from Granada. Refer to note 4 for details.

Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. There can be no assurance that the Company will be successful in its efforts to arrange additional financing on terms satisfactory to the Company. If additional financing is raised by the issuance of shares from the treasury of the Company, existing shareholders ownership may be diluted. See note 12, *Subsequent Events*.

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and commodity and equity prices.

(a) Interest rate risk

The Company is not exposed to interest rate risk as it does not have interest bearing debt.

(b) Commodity price risk

The ability of the Company to develop its mineral properties and the future profitability of the Company is directly related to the market prices of silver, cobalt and nickel.

(c) Share price risk

The Company is exposed to share price risk related to the common shares of Granada. A 10% change in the share price of the Company's marketable securities would result in a corresponding change to net loss in the amount of \$90,005 for the three months ended March 31, 2022.

Notes to the Condensed Interim Consolidated Financial Statements March 31, 2022 and 2021

(Unaudited - expressed in Canadian Dollars)

Currency Risk

As the Company transacts business in Canadian dollars, there is minimal foreign currency risk at March 31, 2022 and December 31, 2021.

11. COMMITMENTS AND CONTINGENCIES

(a) Environmental Contingencies

The Company's exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

(b) Flow-Through Shares

The Company has indemnified the subscribers of current and previous flow-through share offerings against any tax related amounts that may become payable by the subscribers as a result of the Company not meeting this expenditure commitment. As at March 31, 2022 the Company has a remaining commitment to incur \$3,966,623 of expenses as required under the flow-through share offerings during 2022. These expenses must be incurred prior to December 31, 2022.

(c) Management Contracts

The Company is party to multiple management contracts. Upon the occurrence of certain events such as a change in control, the contract requires payment of up to \$604,000. As a triggering event has not taken place, the contingent payment has not been reflected in these financial statements.

The Company has entered into a Memorandum of Understanding ("MOU") with the Matachewan First Nation community in connection with certain exploration and evaluation programs in their area; to support the engagement process two per cent of the exploration costs are provided to the First Nation, calculated and paid on an annual basis following the end of the calendar year.

In addition, the Company has entered into a second MOU with both Temagami First Nation and Teme-Augama Nation to provide a framework process for consultation during the life of the project.

The MOUs also include terms outlining environmental protection, employment, training and business opportunities, and mitigation of impacts on the traditional pursuits of the members of the First Nation communities.
